OUNTRY	Czechoslovakia	REPOR	r
UBJECT	Praga V-3-S Truck	DATE I	DISTR. 17 September 1956
		NO. PA	AGES 1
		REQUIR	REMENT
		NO.	
DATE OF INFO.		REFERE	
PLACE &		Thi	s is UNEVALUATED Information
		IS ARE DEFINITIVE. APPRAISAL OF	CONTENT IS TENTATIVE.
	usage and the brakes	is kept very low. The fra are well sealed against wa	
3.	ground clearance is I terrain driving. Deep proper angle because of the truck.  The V-3-S can be adam	neels for transfer of powe fted to 400 millimeters, a ditches can be overcome en of the good longitudinal and ted to the following species	r to all six wheels the which is advantageous for asily if crossed at a nd transversal stability 25X1
3.	ground clearance is I terrain driving. Deep proper angle because of the truck.  The V-3-S can be adam	neels for transfer of powe afted to 400 millimeters, a ditches can be overcome en of the good longitudinal and ted to the following speci- anch and crane), tank true.	r to all six wheels the which is advantageous for asily if crossed at a nd transversal stability 25X1 al purposes: mobile work- k, rocket launcher carrier,
4.	ground clearance is a terrain driving. Deep proper angle because of the truck.  The V-3-S can be adapshop, wrecker (with wand transport truck was development center the development center in Prague three-ton terrain veh	meels for transfer of power fited to 400 millimeters, and ditches can be overcome enough the good longitudinal and the good longitudinal and the following speciment and crane), tank truck the tilting platform.  In on of the V-3-S truck was not the Klement Gottwald and 1952 had offered for	r to all six wheels the which is advantageous for asily if crossed at a and transversal stability 25X1  al purposes: mobile work- k, rocket launcher carrier,  25X1  started in 1955 after Automobile Works National
4.	ground clearance is a terrain driving. Deep proper angle because of the truck.  The V-3-S can be adapshop, wrecker (with wand transport truck was development center the development center between in Prague	meels for transfer of power fited to 400 millimeters, and ditches can be overcome enough the good longitudinal and the good longitudinal and the following speciment and crane), tank truck the tilting platform.  In on of the V-3-S truck was not the Klement Gottwald and 1952 had offered for	r to all six wheels the which is advantageous for asily if crossed at a and transversal stability 25X1  al purposes: mobile work- k, rocket launcher carrier,  25X1  started in 1955 after Automobile Works National roduction a new type of
4.	ground clearance is a terrain driving. Deep proper angle because of the truck.  The V-3-S can be adapshop, wrecker (with wand transport truck was development center the development center in Prague three-ton terrain veh	meels for transfer of power fited to 400 millimeters, and ditches can be overcome enough the good longitudinal and the good longitudinal and the following speciment and crane), tank truck the tilting platform.  In on of the V-3-S truck was not the Klement Gottwald and 1952 had offered for	r to all six wheels the which is advantageous for asily if crossed at a and transversal stability 25X1  al purposes: mobile work- k, rocket launcher carrier, 25X1  started in 1955 after Automobile Works National roduction a new type of been tested and gradually  25X1
4.	ground clearance is a terrain driving. Deep proper angle because of the truck.  The V-3-S can be adapshop, wrecker (with wand transport truck was development center the development center in Prague three-ton terrain veh	meels for transfer of power fited to 400 millimeters, and ditches can be overcome enough the good longitudinal and the good longitudinal and the following speciment and crane), tank truck the tilting platform.  In on of the V-3-S truck was not the Klement Gottwald and 1952 had offered for	r to all six wheels the which is advantageous for asily if crossed at a and transversal stability 25X1  al purposes: mobile work- k, rocket launcher carrier,  25X1  started in 1955 after Automobile Works National roduction a new type of been tested and gradually
